Washington, DC 20007

Subject: Notice of Export of **1-Tetradecene homopolymer hydrogenated** to THAILAND

Dear Mr. Ambassador:

Section 12(b) of the Toxic Substances Control Act (TSCA) requires any person who exports or intends to export a chemical substance or mixture from the United States to notify the United States Environmental Protection Agency (U.S. EPA) of such exportation if any of the following actions have been taken under TSCA with respect to that chemical substance or mixture:

- 1) Information is required under TSCA section 4 or 5(b),
- 2) An order has been issued under TSCA section 5,
- 3) A rule has been proposed or promulgated under TSCA section 5 or 6, or
- 4) An action is pending, or relief has been granted under TSCA section 5 or 7.

In turn, TSCA section 12(b) requires the U.S. EPA to notify importing governments of the availability of the required information submitted to the U.S. EPA under the applicable TSCA section 4 or 5(b) action or notify the importing government of the applicable TSCA section 5, 6, or 7 action or relief. See 15 U.S.C. 2611(b) and the U.S. EPA's TSCA section 12(b) regulations at Title 40, Part 707, Subpart D of the Code of Federal Regulations (CFR), for details concerning the TSCA section 12(b) export notification procedures.

The U.S. EPA previously received a notice regarding a chemical substance or mixture exported from the United States to your country. This chemical substance or mixture is currently subject to TSCA section 12(b) export notification because it is subject to one of the actions listed above.

Information specific to the chemical being exported to your country is as follows:

The U.S. EPA has received a notice that the chemical substance or mixture that is the subject of this letter is being exported from the United States to your country. As noted above, such notices are required to be submitted to the U.S. EPA under certain specified circumstances, including one in which a chemical substance or mixture becomes subject to an order issued under TSCA section 5(e). On August 9, 2017, the Agency has issued a section 5(e) order for the chemical substance or mixture that is the subject of this letter in which the following health or environmental toxicity concerns for this chemical substance were addressed: Structure alert. The order requires the following controls and/or limitations: Hazard Communication (labeling, containers, MSDS, precautionary statements, etc.) -Develop and implement a written hazard communication program for the PMN substance in each workplace; Label each container of the PMN substance in the workplace with the information identified in the TSCA Section 5 Order; Develop a Safety Data Sheet (SDS) for each PMN substance to include the information identified in the TSCA Section 5 Order; Provide each employee with

information and training on the PMN substance at the time of first introduction. Risk Notification is required if the results of the required testing determines that the PMN substance may present a risk; Industrial, commercial, and consumer activities (Distribute the PMN substance only to a person who agrees to follow the same restrictions (except the testing requirements) and to not further distribute the PMN substance; Use in the following physical form of the chemical because other forms would result in exposures of concern (not manufacture, process, or use the PMN substance involving a method that generates a vapor, mist, or aerosol); Submit to EPA certain toxicity or fate testing before manufacturing (before the nine months after the date of Notice of Commencement specified in the Consent Order)).

Should you prefer that notice of this type be provided to an official or agency of your government other than you, please provide us with the appropriate name and address.

Additional information concerning these regulations and chemical can be found online at <http://www.epa.gov/tsca-import-export-requirements/tsca-requirements-exporting-chemicals> or by contacting Jim Rahai at 202-564-8593 or rahai.jim@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Keith Avery". The signature is fluid and cursive, with a large initial "K" and "A".
